

Product Data Sheet

MONUMAT ENTRANCE MATTING

MAXI GRIP 2 (02-MG2)

This profile utilises an aluminium tread rail with flexible rubber joiner. Designed to retain 60mm carborundum grit insert which allows for a smoother crossing for wheeled traffic such as walking aids, health care beds and trolleys. The rubber joiner can be punched with holes at 60mm or 120mm centres to assist in the drainage of the mat well area. Ideal for healthcare facilities or areas with a high volume of wheeled traffic that requires particular attention to drainage.

SPECIFICATIONS

| | |

CHOOSE YOUR INSERT COLOUR

Grip

Grip is a combination of carborundum grit and epoxy creating a premium product that provides a safe, anti-slip finish. Ideal for locations where slip risk is high.

Other colours available on request

CHOOSE YOUR ALUMINIUM FINISH

Clear Anodised

A process for producing a translucent film of aluminum oxide which forms an integral part of the aluminum. This creates a very thin coating of immense hardness. Standard anodising is 15-20um (microns).

Black Anodised

Follows the same process as clear anodising but the aluminium is immersed into a tank full of dye which absorbs into the pores of the anodised coating until the depth of colour is obtained.

HOW TO SPECIFY

Copy the prewritten specification below and update all sections in brackets to create your project specification.

Description

Monumat Maxi-Grip 2 profile in (clear/black) anodised finish aluminium with (nominate insert colour) insert to be installed within (MF1235/RF1296) (clear/black) anodised aluminium perimeter frame.

Example - Typical Specification

Monumat Maxi-Grip 2 profile in clear anodised finish aluminium with charcoal insert to be installed within MF1235 clear anodised aluminium perimeter frame.
